

Kumar Piyush

+91-8789596773 | kp5406.mbi@gmail.com | github.com/kp5406mbi-cloud

Backend Developer | Java | Spring Boot | REST APIs

Education

Birla Institute of Technology, Mesra
Integrated M.Sc. in Mathematics and Computing

Ranchi, India
2023 – 2028

Technical Skills

- **Backend:** Spring Boot | RESTful APIs | MVC Architecture | Exception Handling
- **Database:** PostgreSQL | JPA | Hibernate | Query Optimization
- **Languages:** Java | JavaScript
- **Tools:** Git | Postman | Render | Swagger
- **Concepts:** Data Structures and Algorithms | OOP | API Design | Scalable Systems

Projects

Job Portal Backend Application

GitHub

Live Demo: job-portal-springboot-sek1.onrender.com

- Engineered a scalable backend using **Spring Boot** and **PostgreSQL** for job posting workflows
- Developed RESTful APIs with pagination, sorting, and filtering using **Spring Data JPA** to efficiently handle large datasets Implemented **role-based access control** using Spring Security for secure endpoint authorization
- Ensured data integrity using validation and database constraints for consistent application behavior
- Optimized database queries using indexing and efficient JPA mappings to improve performance
- Structured application using **layered architecture (Controller-Service-Repository)** for scalability and maintainability

Task Manager Application

GitHub

- Built a secure backend using **Spring Boot** with **JWT-based authentication**
- Implemented **stateless authentication** using custom JWT filter and Spring Security
- Designed **role-based access control (USER / ADMIN)** for protected APIs
- Developed REST APIs with validation and **BCrypt** password encryption
- Built a responsive frontend using **HTML, CSS, JavaScript** with JWT-based access control

Additional Information

- Solved problems on Data Structures and Algorithms focusing on arrays, linked lists, and stacks
- Strong understanding of backend development principles, API design, and system scalability
